# VISION

Between the handle and the door, a subtle connection is born, where functionality meets aesthetic expression. The handle is not merely a decorative detail, but the element that brings the door to life, transforming it from a simple boundary into a natural gesture of passage and connection between spaces.

Through its shape, texture, and finish, the handle reflects the character of the environment and the refinement of those who choose it. Whether defined by minimalist contemporary lines or by the classic elegance of metals such as brass, steel, or iron, it harmoniously completes the door's architecture and enhances its visual identity.

Designed to integrate perfectly with the touch of the hand, the handle must provide fluidity, resistance, and comfort, becoming part of the sensory experience of every space. In the balance between matter and movement, between discretion and presence, the harmony between door and handle is shaped, an essential union capable of combining beauty, utility, and style into a timeless expression.

Every detail is designed to withstand the test of time. Through advanced finishing technologies and next-generation production processes, our handles combine aesthetic refinement with functional standards.

The innovative PVD (Physical Vapour Deposition) treatment provides surfaces with high hardness, resistance to wear, corrosion, and UV rays, preserving the intensity and elegance of the finishes for decades.

Premium galvanic finishes, made from solid brass and certified alloys, are protected through multiple layers of copper, nickel, and chrome treatments, ensuring durability and a flawless appearance over time. Our collections stand out through elegant minimalism and innovative solutions: integrated return-spring mechanisms and certified systems designed for intensive use, tested for hundreds of thousands of cycles. Each product is engineered for comfort, fluidity, and reliability, integrating seamlessly into the contemporary architecture of the space.

For enhanced security, the systems include handle rotation-blocking mechanisms, providing additional protection against unauthorized access through doors or windows.

European certifications and international standards confirm technological excellence and attention to every production stage, from casting and finishing to assembly and quality control. The result is a collection of handles that redefines the balance between design, performance, and innovation.

<b>Design</b>	Fluid lines and balanced proportions define a contemporary design created for modern and elegant interiors.
<b>Comfort</b>	The ergonomic shape provides a natural grip and comfortable daily use.
<b>Material</b>	Made from premium brass, the handle ensures excellent durability and a solid feel to the touch.
<b>Finishes</b>	Available in refined finishes such as Cromo, Chrome, Graphite, and Matte Graphite, suitable for multiple interior styles.
<b>Aesthetics</b>	Its minimalist appearance and clean surfaces transform the handle into a subtle detail with strong visual impact. Standard and Zero Evolution mounting system.

Fluid and refined, this handle represents the perfect balance between minimalist style and contemporary functionality. Its clean design, defined by simple lines and harmonious proportions, integrates naturally into any type of interior, from modern and minimalist spaces to elegant and sophisticated environments. The ergonomic shape provides comfortable use and a pleasant tactile experience, highlighting attention to detail and quality. Made of premium brass, the handle impresses through strength, stability, and long-term durability, maintaining its flawless appearance even under daily use. Carefully selected finishes such as Cromo, Chrome, Graphite, and Matte Graphite add personality and refinement to every space. Through the combination of modern aesthetics and practical functionality, this model transforms an ordinary element into a sophisticated design detail, capable of harmoniously complementing any contemporary door and adding extra elegance to the overall environment.

<b>Design</b>	Thin, elegant lines provide a modern appearance, perfectly suited for contemporary interiors and spaces with a minimalist aesthetic.
<b>Comfort</b>	An ergonomic shape designed for everyday comfort, with no compromise between style and functionality.
<b>Material</b>	Cromall®, primarily composed of high-purity zinc alloyed with aluminum, magnesium, and copper, enhances structural integrity and corrosion resistance.
<b>Finishes</b>	Available in sophisticated finishes such as Cromo, Matte Black, Matte White, and Umber Bronze, adapted to any interior style.
<b>Aesthetics</b>	The Roboquattro model transforms any door into a discreet decorative element with a modern and refined personality. Standard and Zero Evolution mounting system.

With its thin and refined lines, Robocinque redefines minimalist elegance through a perfectly balanced contemporary design. Created for those who appreciate sophisticated simplicity and authentic functionality, it integrates harmoniously into modern interiors, offering a clean and orderly appearance. The ergonomic shape ensures comfortable use and a fluid experience at every touch, emphasizing carefully studied details and proportions. Made of Cromall®, a premium zinc-based alloy enriched with elements such as aluminum, magnesium, and copper, this handle provides excellent strength, durability, and long-term stability. Elegant finishes, from Cromo and Chrome to Matte Black, Matte White, and the sophisticated Oroplus, allow easy integration into various interior styles. More than a simple functional element, this handle becomes a subtle architectural detail, capable of complementing and highlighting the aesthetics of any contemporary space with refinement and personality.

# GRYPS

*Industrial texture with impact*

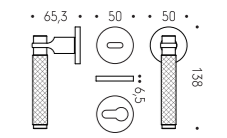

Oromat

Cromat

Gryps impresses through a sophisticated design, highlighted by its distinctive texture that conveys a strong character and a unique contemporary aesthetic. Inspired by the precision of industrial elements and reinterpreted into an elegant form, this handle becomes more than a simple functional accessory—a design detail with remarkable visual impact. The textured surface not only enhances its premium appearance but also provides excellent grip, ensuring comfort and control in daily use. The cylindrical shape and clean lines create a perfect balance between robustness and refinement, allowing seamless integration into modern, minimalist, or industrial interiors. Made from premium brass, Gryps guarantees strength, stability, and long-term durability, maintaining its flawless appearance even after extended use. Sophisticated finishes such as Oromat, Cromat, and Matte Graphite define its exclusive design, offering subtle elegance and versatility for any contemporary space.

<b>Design</b>	Industrial texture and cylindrical lines create a sophisticated design with strong personality and contemporary influences.
<b>Comfort</b>	The textured surface provides excellent grip and a comfortable tactile experience in daily use.
<b>Material</b>	Made from premium brass, the handle guarantees superior strength, stability, and long-lasting durability.
<b>Finishes</b>	Available in elegant finishes: Oromat, Chrome, and Matte Graphite, suitable for modern and refined interiors.
<b>Aesthetics</b>	Its technical appearance and textured details transform the handle into a distinct and sophisticated decorative element.

# DUE / DUE Q

Vibrant Colors,  
Bold Design

Due and Due Q perfectly combine contemporary elegance with chromatic expressiveness, transforming a functional element into a design accent with strong personality. Defined by clean lines and balanced geometric forms, the two models are distinguished by the rose shape—round for Due and softly squared for Due Q—offering aesthetic flexibility for different interior styles. The minimalist design is complemented by an impressive selection of finishes in intense, vibrant colors such as Sunset Orange, Ocean Blue, Strawberry Red, Lime Green, and Capri Blue, alongside elegant tones like Black, Silver, and Titan. Made from Cromall®, a premium zinc-based alloy enriched with aluminum, magnesium, and copper, these handles provide excellent strength, stability, and long-term durability. Due and Due Q add energy, style, and originality to any contemporary space, becoming decorative details with remarkable visual impact.

<b>Design</b>	Bold lines and geometric forms highlight a modern design full of personality and contemporary elegance.
<b>Comfort</b>	The ergonomic shape ensures comfortable and natural use, perfectly adapted to daily operation.
<b>Material</b>	Made of Cromall®, a premium zinc-based alloy, the handle provides strength, durability, and flawless finishes.
<b>Finishes</b>	Available in a wide range of vibrant and bold colors, from Sunset Orange to Ocean Blue or Lime Green.
<b>Aesthetics</b>	Its minimalist appearance and intense colors transform the handle into a modern and expressive decorative accent.

## DUE/DUE Q

Vibrant Colors,  
Bold Design

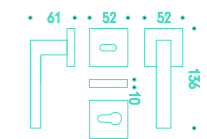

<b>Design</b>	Precise lines and angular forms define a modern geometric design with an elegant, architectural character.
<b>Comfort</b>	The solid and well-balanced shape ensures a comfortable grip and smooth use at all times.
